

THICHANAMOORTHY T

EV Engineer | Battery Systems | BMS | Embedded Systems

Email: thichu683@gmail.com | LinkedIn: linkedin.com/in/thichu | Portfolio

Professional Summary

Electronics and Communication Engineering student with hands-on exposure to EV systems, lithium-ion batteries, BMS, electric motors, power electronics, EV charging, vehicle diagnostics, ADAS, and embedded systems. Experienced in developing an EV dashboard with real-time vehicle monitoring and ADAS warning features. Strong foundation in C, Python, Embedded C, sensors, microcontrollers, and PCB design. Seeking an entry-level role in EV systems, battery systems, embedded systems, EV testing, or vehicle electronics.

Technical Skills

EV & Automotive: EV Architecture, Lithium-ion Batteries, Battery Pack, BMS, SOC/SOH, Cell Balancing, Series/Parallel Configuration, Electric Motors, Power Electronics, EV Charging, Vehicle Diagnostics, ADAS, EV Safety

Embedded Systems: ESP32, Sensors, Microcontrollers, Embedded C, UART, I2C, SPI, Sensor Interfacing, Real-Time Monitoring

Programming: C, Embedded C, Python

HDL: Verilog HDL, VHDL

Tools: MATLAB, LTspice, EasyEDA, LabVIEW, Vivado, EDA Playground

Core Electronics: Digital Electronics, Analog Electronics, VLSI Design, PCB Design, Communication Systems, Instrumentation

Industry Experience

Embedded Systems IoT Intern – Emertxe Information Technologies

June 2026

- Developed an EV dashboard for real-time vehicle parameter monitoring.
- Implemented sensor interfacing, data processing, and ADAS-oriented warning features.
- Applied microcontroller and IoT concepts to automotive monitoring applications.

VLSI Design Intern – Silicon Craft VLSI

May 2026

- Gained practical exposure to RTL design, VLSI flow, verification, and semiconductor fundamentals.
- Designed and simulated digital circuits using Verilog HDL and FPGA tools.

Projects

EV Dashboard with ADAS Warning System

- Developed an embedded dashboard for real-time vehicle parameter monitoring.
- Integrated sensors and implemented obstacle-detection-based warning functionality.
- Applied embedded systems and data processing concepts to an automotive application.

WhatsApp-Based Smart Home Automation System

- Developed an IoT system using ESP32, sensors, ThingSpeak Cloud, and Twilio API.
- Implemented remote monitoring and appliance control through a communication interface.

Leadership & Volunteer Experience

Co-Chair, YUVA Club – Entrepreneurship Development Cell (EDC) – EASA College of Engineering and Technology **2024 – Present**

- Coordinated technical workshops, seminars, and student activities.
- Led volunteer teams and supported technical event planning and execution.

Achievements

- Participated in 30+ technical workshops, seminars, and engineering events.
- Participated in 2 hackathons and collaborated with multidisciplinary teams.

Certifications

- Advanced EV Manufacturing Skilling Programme** – GTT Foundation, supported by Accenture
120 Hours – Theory + Practical; EV Architecture, BMS, Manufacturing & Quality, Automotive Standards.
- NPTEL – Internet of Things (IoT)** – Score: 70
- NPTEL – Industrial Internet of Things (IIoT)** – Score: 57
- VLSI – FPGA Based System Design Internship** – Silicon Craft VLSI

Aug 2026

Education

B.E. Electronics and Communication Engineering

EASA College of Engineering and Technology,
Coimbatore

2023 – Present

CGPA: 7.99/10 (Up to 6th Semester)

Higher Secondary Education

Jayaseelan Matric Higher Secondary School, Batlagundu
